

# OXIRA X-Series

used across four continents,  
now in its 5<sup>th</sup> Generation

**“... effectively reduced 96% of bacteria  
and fungi within the first 3 hours ! “**

*Dr. Abhay Chowdhary, Director of Bacteriology,  
The Haffkine Institute, Advanced Centre for Disease Control, established in 1899.*

Developed to provide a safe source of ultraviolet irradiation to help clean your air.  
Helps protect yourself and others around you from airborne germs.

As these units are designed to mimic mother-nature, they operate quietly, efficiently,  
and without the use of chemicals !

Two Models

**XG model utilises 254nm UVC to effectively reduce germs in the air.  
This mimics the germicidal effects of sunshine.  
Ideal for areas where its important to protect against airborne transmission.**

**XN model utilises 185nm UVC to generate ozone, attacking odour particles.  
This mimics the deodorising effects of thunderstorms.  
Ideal for areas where unpleasant odours need to be controlled.**

Just plug it in.  
size(mm): 360 x 65 x 50h x 1.0kg  
power: 220~250V, 50/60Hz, 35Wmax  
Optional brackets are available to suit  
wall and ceiling applications.

World Class.  
Each unit is precision assembled and tested for  
an extended period of time. An encrypted Global  
Identification Number is then assigned, assuring  
you of a genuine world-class unit.

Suitable uses: **Hospital/Clinics, Aged Care, Schools, Hotels, Offices, Food & Beverage, Residential.**

Exclusive Partner in New Zealand:

**COSMO ULTRAVIOLET**
